

title: "Twitter Sentiment Analysis"

author: "Pedro Schneider"

date: "24 de novembro de 2017"

output:

word_document: default

Introduction

This is a work of social network analysis - Twitter. The idea was to generate some information from the analysis of sentiments. Sports brands related to Tennis sport (one of the author's hobbies) were used as Twitter search terms. First was generated a visualization through the wordcloud format and then attributed positive and negative scores to the tweets for a classification and comparison between brands.

Packages and Authentication

NOTE: Credentials must be entered according to each user's individual credentials.

Installing and Loading the twitterR Package

```
#install.packages("twitterR")  
#install.packages("httr")  
#install.packages("devtools")  
library(twitterR)  
library(httr)  
library(devtools)
```

```
## Warning: package 'devtools' was built under R version 3.4.2
```

Creating Authentication on Twitter

```
api_key <- "ryMTtqouq3iDTmwi8saGPKGXX"  
api_secret <- "rzTsZULivNYa2UPBcpfAIGNLwEMdBBiCD9B5jYJDzw7JX7e61F"  
access_token <- "903682863568171009-Jj3eEwnhjmu51Ubv8p90YUjrKWxFy7a"  
access_token_secret <- "8ZXrpx3bRykhgCU4kGkwRredI5ZL3XGriybpbkqb2upEtj"
```

Authenticating on Twitter

```
setup_twitter_oauth(api_key, api_secret, access_token,  
access_token_secret)
```

```
## [1] "Using direct authentication"
```

Capturing tweets and performing cleanups

Capturing Tweets

```
wilson_tweets = searchTwitter("Wilson Tennis", n = 500, lang = "en")
```

```

## Warning in doRppAPICall("search/tweets", n, params = params,
## retryOnRateLimit = retryOnRateLimit, : 500 tweets were requested but
the
## API can only return 212

nike_tweets = searchTwitter("NikeCourt", n = 500, lang = "en")

## Warning in doRppAPICall("search/tweets", n, params = params,
## retryOnRateLimit = retryOnRateLimit, : 500 tweets were requested but
the
## API can only return 386

head_tweets = searchTwitter("Head Tennis", n = 500, lang = "en")
babolat_tweets = searchTwitter("Babolat", n = 500, lang = "en")

# Viewing the first lines of the tweets object
